Optional In-Feed Elevator
Delivering to Two One Tonne Bins.

Specifications

Product:

Potatoes, Onions & Citrus

Bin Specification:

1/2 Tonne & One Tonne Bins

Mode of Operation:

25 Tonne TPH

Fully Automatic

The Dual Soft Fill Bin Filler delivers the product gently into the bin. The soft top cleats on the cross conveyor cushion the product at the supply point. The 'Gooseneck' effect on the filling arm ensures that the product is gently placed into the 1 or 1/2 tonne bin.

As the bin fills, a photoelectric eye senses the need for the feed belt to elevate and retreat along the bin ensuring complete filling of the bin. As one bin is being filled, the full bin at the opposite end can be replaced with an empty one.

The bin filler is electrically operated. It's simple yet robust design allows for ease of operation and gentle handling of the product without compromising capacity.
