

edp Fan Onion Topper

Top & Tailer

- Ideal for Undried Onions
- Easily Replacable Vibrating Screens
- Quick Action Blade Maintenance
- Very Gentle on the Product

www.edp.com.au

Onion toppers are designed to top the 'tail' of onions. This is done by rotating knives under vibrating sieves. The vibrating sieves causes the 'tail' of the onions to fall through the sieves, and is then cut off by the knife. The sieves of the machines are very easy to change because of the 'quick lock' system. The edp australia onion toppers are designed to be extremely produce friendly, and safe to use. Knives and propeller must be cleaned daily.

edp Fan Onion Topper

Extremely Efficient &
Quiet in Operational
Environment

Top & Tailer

Options

- **Pre-grader.** The pre-grader of the A1 onion topper will cause the undersize produce, and small waste, to fall through. This makes sure the undersize onions do not enter the machine, which creates dust and causes you to have to clean the machine more often
- **Extra sieve(s)**
- **Frequency inverter** knife motor
- **Extra set of knives** for one propeller
- **Frequency inverter** on the sieve motor. In some cases, it is needed that the sieves of the machine do not shake at full speed. This might occur when the produce is very delicate. In most cases however it is best to have the motor run at full speed.
- **Machine on wheels** (A1 Only). In some cases, it is needed to be able to transport the onion topper. edp australia is able to fit the machine with wheels.

Dual Blade Unit

Version	Number of Propellers	Waste Belt	Dust Hood	On Wheels	Capacity Onions	Capacity Set-Onions
A1	1	Standard	Standard	Option	3-4 tons / hour	2 tons / hour
A1 + pregrader	1	Standard	Standard	-	3-4 tons / hour	2 tons / hour
A2	2	Standard	Standard	-	6-8 tons / hour	4 tons / hour
A2 + pregrader	2	Standard	Standard	-	6-8 tons / hour	4 tons / hour
A3	3	Standard	Standard	-	9-12 tons / hour	6 tons / hour
A3 + pregrader	3	Standard	Standard	-	9-12 tons / hour	6 tons / hour
