Orchard Elevated Work Platform

Joe Marsters Signature Edition

Series 4

edp australia have set the pace in the fruit picking and pruning industry for over 35 years. Now, due to our commitment for continuous improvement, the new series 4 powerladders has raised the standards once more.

The machine is powered by a Honda 11hp petrol engine, with electric and manual start function. Maintenance is made easy with access via the moulded engine covers which are lockable and designed to avoid catching on low branches.
